Voicebrook to Exhibit at SNUG 2010

Company to discuss VoiceOver® integration with SCC Soft Computer's SoftPath® anatomic pathology system

LAKE SUCCESS, NY May 24, 2010 – Voicebrook, the leading provider of integrated speech recognition and digital dictation solutions for Pathology, today announces that it will be attending SCC Soft Computer's 2010 Soft Network Users Group (SNUG) conference in Clearwater, Florida. The Conference is being held from May 24th through the 26th, and members of the Voicebrook team will be available to discuss the benefits of implementing Voicebrook's VoiceOver® speech recognition and digital dictation platform with SCC's SoftPath® anatomic pathology system.

Voicebrook's VoiceOver® Enterprise solution is deployed in over 125 hospitals and laboratories across the United States and Canada. It features the most accurate speech recognition technology (Dragon® Medical 10), powerful self-edit tools, and a robust templating system. When combined with the VoiceOver® SoftPath® workflow Personality, pathologists navigate by voice and dictate their reports directly into SoftPath® in a hands-free laboratory environment.

The VoiceOver® SoftPath® Personality includes a comprehensive collection of voice commands and productivity tools that enable SoftPath® users to achieve the highest level of success with speech recognition technologies. Pathologists can dictate, review, and sign-off on their reports immediately, eliminating the need for third-party transcription, or they can elect to use the integrated VoiceOver® Recorder or Delegated Medical Editing add-on, which enables users to create digital dictations that are routed for deferred transcription or third-party editing. The combination of real time speech recognition and traditional transcription workflow tools provides customers with a complete reporting solution that can meet the needs of the most diverse Pathology laboratories.

E. Bruce Sopko, VP Sales said, "Over the past year we have implemented VoiceOver® and the SoftPath® personality at several labs across the country. We have proven that our solutions can be integrated successfully and will provide labs with real benefits, including rapid return on investment and substantial reductions in turnaround time. We look forward to discussing the benefits of our solutions with the SoftPath® community of users."
